

## Maintenance Supervisor – Permanent Employment

**Location:** Cabuyao, Laguna, Philippines

**Duration:** 6 months' probation period / permanent employment

**Job Requested Date:** September 8<sup>th</sup>, 2025

**Target Start Date:** Urgent

### Company description:

Founded in 2016, REurasia Management Corporation is a Philippines based company involved in Renewable Energies. We are focusing our efforts toward socially responsible energies with the biggest impact on our community.

Created from a Joint Venture with Full Advantage Philippines and international EPC professionals, REurasia is able to Develop, Implement and Operate Power Plants fueled with Biomass and/or Municipal Waste. Building Power Plants from the ground up, our services include: Project Feasibility Study, Permitting & Licensing, Equity Financing, Debt Financing, Technical Bidding Coordination, Project Management & Owner Engineering and Operation on a broad range of technologies and suppliers.

Reurasia is supporting the local community's best interest by developing and supporting green and sustainable projects in the Philippines.

Among other, our team has a proven expertise over South East Asia (India, Thailand and Philippines) and accumulates more than 182 MW generating power capacity field experience of Renewable Energy Power Plants.

Specialized in Biomass, Solar and Waste to Energy Power Plants, our team guides clients through all the life of their project including the development, the construction and operation.

### Job description:

We are seeking an **experienced Maintenance Supervisor** to lead and oversee the maintenance team responsible for the safe and efficient operation of **18TPH Biomass Boiler**. The Maintenance Supervisor will ensure that all **mechanical, electrical, and auxiliary equipment** are properly maintained, troubleshoot issues as they arise, and implement preventive maintenance strategies. He/she will work closely with plant management to ensure compliance with company standards, safety regulations, and environmental requirements.

---	---	--

**Responsibilities:**

- Ensure the timely delivery and accuracy of the periodic reports to management (daily, weekly, monthly, quarterly, yearly)
- Lead and supervise the maintenance team in day-to-day activities.
- Plan, assign, and monitor preventive and corrective maintenance tasks.
- Ensure proper troubleshooting and repair of plant equipment, including pumps, valves, gearboxes, conveyors, and boiler auxiliaries.
- Assign shift schedule and coordinate with operations staff to minimize downtime and optimize performance.
- Implement safety protocols, including PTW, LOTO, and hot work procedures among others.
- Maintain accurate maintenance records, logs, and reports.
- Mentor, train, and evaluate maintenance team members.
- Assist in procurement and inventory control of spare parts and tools.
- Support commissioning and installation of new equipment.
- Ensure compliance with DOLE OSH standards and DENR environmental regulations.

Participate in **safety drills, training, and continuous improvement programs** related to safety and efficiency.

**Qualifications:**

- Bachelor's degree in mechanical, Electrical, or related Engineering field (preferred) or equivalent technical background.
- At least 4-5 years of maintenance experience in power plants, biomass, or heavy industries, with at least 2 years in a supervisory role.
- Strong leadership, organizational, and problem-solving skills.
- Knowledge of mechanical systems, electrical systems, and industrial safety practices.
- Ability to read and interpret technical drawings, P&ID, and equipment manuals.
- Proficiency in maintenance planning and reporting.
- Strong commitment to safety, teamwork, and continuous improvement.
- Physically fit and willing to work in shifts, emergency callouts, and scheduled plant shutdowns.

Must be available to start immediately and be willing to work in Laguna.
